PROFILE

I'm a frontend specialist with over a decade of full-stack experience, focusing on custom web solutions using React and Next.js. I create custom designed interfaces using SCSS, avoiding pre-built frameworks for a tailored user experience. My expertise extends to AWS administration, CI/CD, and headless CMS integrations (WordPress, Contentful, Strapi). I'm also skilled in integrating AI APIs like ChatGPT and Llama 2. Some of my projects include 3D environments with interactive elements using Three.js.

WORK EXPERIENCE

Tech Lead

R/GA

2019-NOW

- React, Next.js, Gatsby
- CSS, SASS, GSAP (for animations)
- Node.js, Nextjs, Contentful, WordPress
